

OPTI-LIX[®]

Supplement grazing and improve
feed intake and digestion

Grazed grass and forage crops
can lack critical nutrients that
may influence livestock
profitability.

The **OPTI-LIX** range
contains a balance of nutrients
to maintain stock health,
fertility and performance.

DOWNLAND[®]
PARTNERS IN FARMING HEALTH

www.downland.co.uk

OPTI-LIX HIGH ENERGY

20 kg

80 kg

Very high energy (16ME MJ/kg DM) and optimal protein (12%) content to support stock requirements through key stages of the production cycle, including tupping and pre-lambing.

Complete package of minerals and vitamins to help balance potential deficiencies in grazing and forages all year round. Including Availa® selenium, a highly available protected source of selenium to support fertility and immune system functioning.

OPTI-LIX CATTLE MAGNESIUM

20 kg

80 kg

High levels of bioavailable magnesium for where there is a risk of grass staggers on lush spring and autumn grass.

Includes high levels of sugar for palatability, plus protected zinc to support hoof health where there is a risk of lameness.

OPTI-LIX SHEEP MAG

20 kg

Contains 8% highly available magnesium, ideal for all sheep post-lambing in spring and also in autumn where there is a risk of grass staggers.

High sugar content improves palatability to encourage intakes. Complete package of minerals and vitamins, including protected zinc to support hoof and udder health.

OPTI-LIX CATTLE BALANCER

20 kg

80 kg

High sugar and balanced protein content to support forage digestibility and utilisation. Includes natural sources of protein to help support frame growth and milk production, plus urea to support digestion and intake of low protein forages.

Complete package of minerals and vitamins to help balance potential deficiencies in all forage types. Including protected zinc and copper to help support hoof health, growth and fertility.

OPTI-LIX PRE-CALVER

20 kg

80 kg

Low calcium and high magnesium to help the cow prepare for calving and aid where there is a risk of milk fever. Excellent levels of vitamin E and selenium to help support cow and calf immunity and calf vigour.

High sugar content to support utilisation and intakes of poorer quality forages.

OPTI-LIX should be fed on a free-access basis along with ad lib forage or grazing. Site buckets over the whole grazing area to encourage wider foraging. Contact your local Downland advisor to discuss the correct supplementation for your individual farm needs.
